SUMMARY

Results-driven **Software Engineer** with over 2.7 years of experience in designing and implementing scalable applications using **Java**, **Spring Boot**, and **Hibernate**. Proven expertise in **Microservices** architecture, RESTful API development, and leveraging modern front-end technologies like **React.js** and **Angular**. Adept at solving complex problems, enhancing security, and optimizing performance across various projects. Known for a collaborative approach, excellent communication skills, and a commitment to continuous improvement and innovation.

EXPERIENCE

Hinduja Tech Limited (Sep 2022 – Present)

Software Engineer

- Engineered scalable applications using Java, Spring Boot, and Hibernate, incorporating Microservices for increased flexibility.
- Integrated Kafka for efficient event streaming and developed dynamic front-end interfaces with React.js, Angular, and Kendo UI.
- Addressed and fixed a major security vulnerability in the Hyundai DMS project, enhancing data protection.
- Optimized the Hyundai D2C Click-to-Buy platform, significantly improving rendering speeds and overall performance.
- Collaborated closely with cross-functional teams, actively participating in code reviews and adopting new technologies.

Regex Software Solutions (Feb 2022 – Aug 2022)

Java Developer Intern

- Developed Java applications and RESTful APIs utilizing Spring Boot and Hibernate.
- Employed SQL, git, and front-end technologies (HTML, CSS, JavaScript, Bootstrap) to deliver effective solutions.
- Gained valuable experience in scalable architecture design and performance optimization.
- Focused on adhering to best practices and driving continuous development improvements.

PROJECTS

Project: Hyundai Dealer Management System (Full Stack Developer)

Description: A comprehensive system designed to streamline dealership operations for Hyundai, covering new and used vehicle sales, service, and scrappage processes.

Key Achievements:

- Managed the complete software development lifecycle, from requirements gathering to maintenance.
- Addressed a significant security flaw, enhancing system security and client trust.
- Implemented scalable solutions and conducted thorough testing to ensure high-quality results.

Tech Stack: Java, Spring Boot, Hibernate, Microservices, MySQL, JSP, Kendo UI, jQuery.

Project: Hyundai D2C Click-to-Buy (Full Stack Developer)

Description: An online platform allowing Hyundai customers to explore, customize, and purchase vehicles with real-time updates and secure transactions.

Key Achievements:

- Improved rendering speeds, resulting in a more responsive user experience.
- Developed real-time inventory and pricing features, enhancing the buying process.
- Ensured robust functionality through comprehensive testing and debugging.

Tech Stack: Java, Spring Boot, Hibernate, Microservices, MySQL, Angular.

Project: Albonair Website Project (Full Stack Developer)

Description: Developed a comprehensive website to showcase emission control products, featuring a partner login system for managing inventory, sales data, and service updates. The platform allows partners to efficiently track and update product information while providing a seamless user experience.

Key Achievements:

- Built the website from the ground up, managing the entire development lifecycle and integrating key features such as partner logins and data management tools.
- Enhanced rendering speeds, leading to a more responsive and engaging user experience.
- Identified and resolved a critical security issue related to API access, significantly bolstering platform security and protecting sensitive data.

Tech Stack: Java, Spring Boot, Hibernate, React.js, Spring Security.

Project: Visitors Connect Project (*Full Stack Developer*)

Description: A web application for managing visitor data and appointments, featuring secure appointment scheduling and data tracking.

Key Achievements:

- Developed a secure backend with Java and Spring Boot, integrating Hibernate for database management and Spring Security for authentication.
- Optimized API endpoints and ensured high code quality through thorough testing and debugging.
- Managed end-to-end development, integrating key features for partner data management.

Tech Stack: *Java, Spring Boot, Hibernate, Spring Security, React.js, MySQL, Swagger.*

Project: Ashok Leyland Innovation Project(*Full Stack Developer*)

Description: An internal project for tracking and managing vehicle issues with a step-by-step diagnostic process.

Key Achievements:

- Identified and resolved API access issues, enhancing system security and client satisfaction. fixed a critical security issue related to API access, significantly improving platform security.
- Managed server operations and performed system maintenance to ensure stability.

Tech Stack: *Angular, Java, Spring MVC, iBatis, MySQL, Apache Server, PuTTY.*

SKILLS

Languages:

- **Proficient:** Java, C++
- **Working Knowledge:** SQL, JavaScript

Frameworks & Libraries:

- **Backend:** Spring Boot, Spring MVC, Hibernate, Microservices, Kafka
- **Frontend:** React.js, Angular, JSP, Tailwind CSS, Bootstrap, Kendo UI

Web Development:

- **Technologies:** HTML5, CSS3, JavaScript, jQuery, Ajax
- **Tools:** Swagger, JSON/JWT Validation, OAuth, Postman

Database Management:

- **SQL Databases:** MySQL, PostgreSQL
- **NoSQL Databases:** MongoDB

DevOps & Tools:

- **Version Control:** Git, SVN
- **Containers & Orchestration:** Docker, Kubernetes
- **Servers & Deployment:** Apache Server, PuTTY
- **IDEs:** Eclipse, VS Code, STS, PgAdmin

Soft Skills:

- Communication, Analytical Thinking, Team Collaboration, Leadership

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University
B. Tech in Computer Science and Engineering

(Aug 2017 – Sep 2021)

CERTIFICATIONS & TRAINING

- Full Stack Java Development Course ([Certificate Link](#))
- MY SQL ([Certificate Link](#))
- Data Structures and Algorithms in Java([Certificate Link](#))
